*Please see the x-strap.com website to see a description of inversion and eversion.

**** For individuals that need lateral or medial ankle stabilization and foot drop support, the Sprain-Guard™ is designed to work together with our Dorsi-Strap™ for Foot Drop.**

The Sprain-Guard™ works together with your shoe to provide the most effective ankle support available. In order to do this, the Sprain-Guard™ must be professionally attached to your shoe. It's the only way to ensure your safety and comfort.

Send us your shoe. We'll make the attachment, and have the shoe back to you in about a week. We accept checks and money orders ONLY. No Internet, telephone, credit card or fax orders. We ship the Sprain-Guard™ to U.S.A. addresses only.

Please see a fully-illustrated, detailed description of the Sprain-Guard™ in the x-strap.com website. Feel free to call us at (845) 233-4713 if you have any questions.
